

Sinc (onhandig):

$$B = f_m$$
$$r_s = 2B \text{ golfvormen/s}$$

$$r_b = n r_s = 2 n B \text{ bit/s}$$

basisband:

$$r_b = 2 n B \text{ bit/s}$$

doorlaatband:

$$r_b = n B \text{ bit/s}$$

sinc met bijkomende factor:

$$B = 2 f_m$$
$$r_s = B \text{ golfvormen/s}$$

$$r_b = n B \text{ bit/s} = n r_s$$

basisband:

$$r_b = n B \text{ bit/s}$$

doorlaatband:

$$r_b = \frac{nB}{2}$$

Kruising 1 en 2 ($\alpha=0 \Rightarrow 1$, $\alpha=1 \Rightarrow 2$):

$$B = (1+\alpha) f_m$$
$$r_s = \frac{2B}{(1+\alpha)} \text{ golfvormen/s}$$
$$r_b = \frac{2nB}{(1+\alpha)} \text{ bit/s} = n r_s$$

basisband:

$$r_b = \frac{2nB}{(1+\alpha)} \text{ bit/s}$$

doorlaatband:

$$r_b = \frac{nB}{1+\alpha}$$

$$r_b: \text{ bit/s} = \# \text{golfvormen/s} * \# \text{bit/golfvorm} = n * r_s$$

$$r_s: \text{ symbolen/s} = \text{baud} = \# \text{golfvormen/s over transmissiekanaal}$$

B: bandbreedte (frequentie-gedrag)

n: 2^n verschillende golfvormen
